ABOUT ME

Hello my name is Iblal and I'm a self-taught software developer looking to break into the industry. I started my software journey in October of 2020. Ever since then I have been fully immersed in the world of computer science. I'm eager to learn new technologies and expand on the ones I already know. I would love nothing more than to get paid to do this for a living as this is truly my passion and I don't see myself doing anything else.

SKILLS

Front End:

- HTML
- CSS
- Javascript
- BootStrap

Back End:

- .NET Core
- C#
- Entity Framework Core
- MS-SQL
- ASP.NET MVC
- Git

PROJECTS

BugTracker Web App — *https://github.com/Iblal/BugTracker*

This app encapsulates what I've learnt since October 2020. It's still a work in progress. I chose to develop a bug tracker because I can use it for future projects and demonstrate skills I have acquired since the beginning of my software journey. I have learnt a tremendous amount since beginning this project.

EDUCATION

CUL Academy, Birmingham UK— *GCSE*

I attended CUL academy where I achieved 9 GCSE's. I achieved grade 5's

in Math and English and Grade B's in science and additional science.

EDUCATION

James Watt College, Birmingham UK— *Railway engineering Level 3.*

I attended James Watt College where I achieved a level 3 in rail engineering.
